

RECOVERY

smart aging

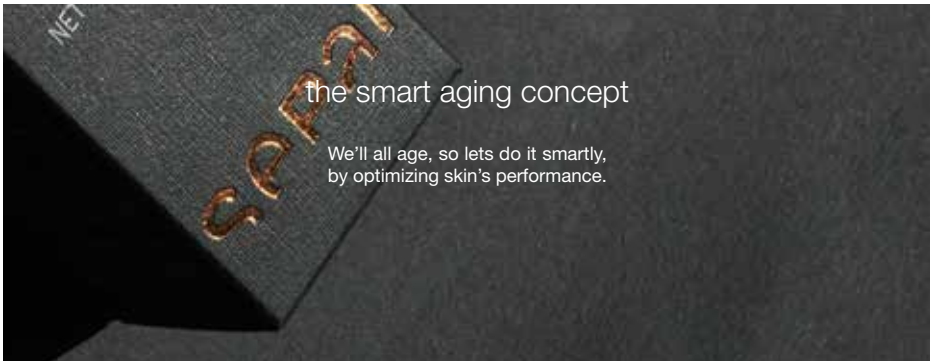

beyond skin awakening

Optimized cellular performance for a real and long-lasting anti-aging treatment. RECOVERY targets the 5 main causes of skin aging:

Provides energy recharge, stimulates the production of total proteins of the skin, enhances skin's ability to defend, protect and repair itself and as a consequence: it rewinds the aging clock of your skin. A preventive and repairing system to maintain the optimum conditions of the skin, recharging your cell's energy at the source and working as a "personal trainer" for the cells.

Facial products are available in two versions: standard for normal to oily skin types or those looking for a matte finishing and + for normal to dry skin types or those who prefer a more nourishing sensation.

Can be enhanced with TUNE IT Boosters.

the smart aging concept

We'll all age, so lets do it smartly,
by optimizing skin's performance.

TARGETING THE ROOT OF YOUR TROUBLES

treats all aging causes

Sepai has developed a **360 degree formulation** to fight all skin aging causes in one single concept: **RECOVERY**.

like a personal trainer

Intelligent • Preventive and repairing system that works on **maintaining the optimum conditions of the skin**, recharging cell energy at the source and working as a personal trainer for the cells.

with molecular and biotech actives

Molecular • Created on the base of **15 engineered actives**, RECOVERY increases the longevity and recovery capabilities of the cells*, provides energy recharge*, stimulates the production of total proteins of the skin*, enhances skin ability to defend, protect and repair itself* and as a consequence: it rewinds the clock of your skin.

reactivating optimum skin performance

Recovery • **Rescues optimum skin performance**, makes cells work as if they were young again, trains skin to be active again, recovers the natural youth improving vital skin functions and defying the effects of aging in the mid-term: anti wrinkles, restructuring, anti-stress, and long term: overall visible skin improvement.

THIS IS WHAT RECOVERY CAN DO FOR YOU

Cellular Longevity • Encourages the prioritization of DNA repair for skin cells instead of discarding them and creating new copies. As a result the life of the cells is prolonged and, above all, sustained under improved conditions.

Recharge of Cellular Energy • Provides skin cells with ATP (Adenosine-5'-triphosphate) which encourages cell binding. Helps protect the skin from exposure to noxious or aggressive agents such as pollution.

Protein Stimulation • Helps improve the quality and quantity of elastin, collagens I, III, V and VII, fibronectin, laminin, keratin and β 1 integrin synthesis thus resulting in a skin better sustaining its regenerative capacity.

DNA Protection • Repairs and protects cells and their DNA information, avoiding mistakes in cell replication.

Defense Against Environmental Factors • Blocks chemical processes that age the skin such as glycation, protein oxidation, amino acid nitration, biologically protects against UVA and UVB radiation as well as pollution, extreme temperatures and immune-suppression caused by UV. The result is a global protection against the environmental factors that cause skin aging.

These aspects of the ethiopathogeny of the skin have been defined by a group of scientists specializing in skin research and have been identified as the most important causes of skin aging that can be treated at the topical level.

*Tested *in vitro*

RECOVERY

RECOVERY FORMULA

Skin suffers progressive decrements with age that result from damage caused by physiological mechanisms, genetic predisposition and external insults. Aging is a multi factorial process resulting in several functional and aesthetic changes in the skin. Advances in research have yielded a tremendous amount of information on the molecular pathways involved in both intrinsic aging (natural) and extrinsic aging (including photo-aging).

Over time the energy of the cells decreases, the cells are copied with errors in DNA, protein production decreases, the tissue collapses and creates wrinkles and sagging, the natural light disappears and the skin loses its natural ability to protect and defend against internal and external aging factors.

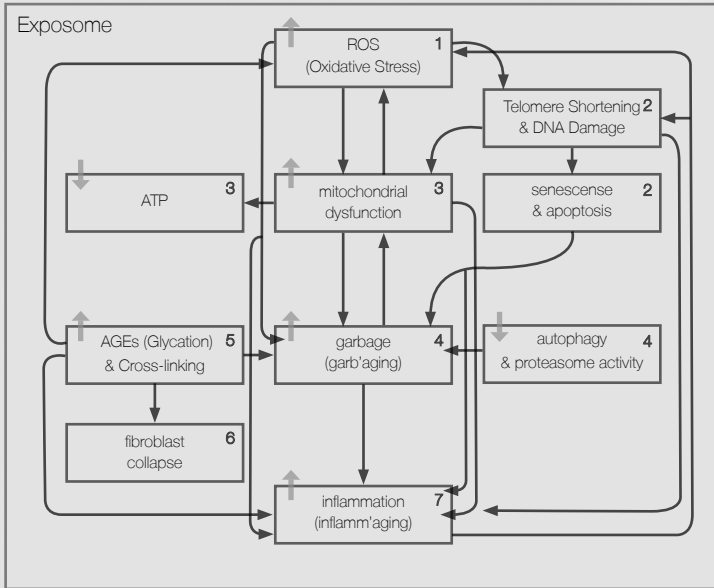

WE ALL AGE; THE TRICK IS LEARNING HOW TO AGE SMARTER.

RECOVERY formula embraces all necessary actives to act on the **major causes of skin aging**. Sepai has developed a 360 degree formulation to fight all skin aging causes in one single concept: RECOVERY, an **optimized cellular performance for a real and long-lasting smart-aging treatment**.

Created on the base of 15 engineered actives, RECOVERY targets the 5 main causes of skin aging: provides energy recharge, stimulates the production of total proteins of the skin, increases the longevity and recovery capabilities of the cells, enhances skin's ability to defend, protect and repair itself and as a consequence: it rewinds the aging clock of your skin.

A preventive and repairing system to maintain the optimum conditions of the skin, recharging your cell energy at the source and working as a "personal trainer" for the cells, training them to be active again. Recover your natural youth improving vital skin functions and defying the effects of aging in the mid-term (anti wrinkles, restructuring, anti-stress effect), and long term: overall visible skin improvement and performance.

Aging Interactome

RECOVERY formula ingredients

1

- INTERNAL PROTECTION
- DNA PROTECT
- ENVIRONMENTAL STRESS CONTROL

2

- LONGEVITY EXTENDER
- DNA PROTECT
- ENVIRONMENTAL STRESS CONTROL

3

- INTERNAL PROTECTION
- ENVIRONMENTAL STRESS CONTROL
- CHRONO ENERGIZING COMPLEX

4

- LONGEVITY EXTENDER
- DETOX SYSTEM
- ENVIRONMENTAL STRESS CONTROL

5

- DNA PROTECT
- CHRONO ENERGIZING COMPLEX

6

- LONGEVITY EXTENDER
- INTERNAL PROTECTION
- DNA PROTECT
- REDENSIFIER
- GROWTH-DAMAGE CONTROL-FACTOR
- ADENOSINE

7

- INTERNAL PROTECTION
- DNA PROTECT
- ENVIRONMENTAL STRESS CONTROL
- PREBIOTIC REBALANCER
- NEURO SEDATIVE PEPTIDE
- GREEN HYALURONIC
