WHAT IS TUNE IT

TUNE IT by Sepai is a customizable treatment designed to prevent, correct and maintain the optimum conditions of the skin, via a base product and different specific Boosters.

The base products are anti-aging, repairing, protective and nourishing serums and moisturizers designed to target all causes of aging.

The TUNE IT Boosters have been developed with biotechnological and molecular engineering actives to target specific skin needs and concerns.

By mixing the specific Boosters with the SEPAI desired base each customer can create the treatment that best suits his individual needs.

HOW TO USE IT

Remove the o-ring seal. Remove the cap of the syringe, empty the entire content of the syringe into the SEPAI cream or serum bottle.

Stick the label enclosed on the marked area of the bottle. If you encounter any difficulties in emptying the syringe's content, replace the cap, place it in a glass of warm water for 5 minutes, then remove the cap and repeat the operation.

Shake vigorously before each use and apply onto clean, dry skin. Use according to the indications on the SEPAI cream or serum with which it is combined.
